Offer

Building Inspection

We are offering the new services to the Macedonian market so called HOME/BUILDING INSPECTION. BUILDING DIAGNOSTICS is noninvasive examination that with the help of appropriate technical equipment creates a clear picture of the state of the examined building. It allows to identify hidden defects that are invisible to the naked eye or are invisible by standard examinations method. In Macedonia, only CIVKON AGI doo has the overall equipment to perform this type of testing. The equipment enables us to carry out detailed high-tech analysis of the situation of the dwellings, as well as the correctness of the integrated systems in it.
