

Bitcraft Sp. z o.o

<http://bitcraft.com.pl>

Description

We specialize in designing and deploying innovative custom software for desktop, mobile and web. We have vast experience in Healthcare, Fin-tech, Automotive and IoT. Bitcraft also offers consulting in terms of high-tech and ICT business development. Our team consists of a group of project managing professionals, business analysts, programmers, user interface and graphic designers. Professionalism, accuracy and dependability gave us a reputable opinion, despite our relatively short time on the market. We believe in innovation. We believe in a world changing ideas and we help turning them into reality. We gathered multiple positive comments and feedbacks from our international partners.

Offer & Request

Consulting - Bitcraft Brainstorm

It is a process (BB for short) that makes your project and idea better! It was created during multiple cases of close cooperation with start-ups.

The result is a rich feedback:

fresh, honest look on existing product / idea,
new approach towards existing solutions,
definitely an innovative approach,
confirmation whether the project is going in the right direction,
simpler (if needed) solutions,
proposition of the technology stack,
workload estimations,
updated schedules,
processes with diagrams,
user stories,
use cases,
functionalities revised,
better, faster, "bigger"? Product,
that and much, much more

Cooperation Offered

1. Technical co-operation
